

Technical information

Finicon Pyrecap 8-02 is a long-lasting, broad-spectrum water-based concentrated microencapsulated insecticide. The formula contains extract of flowers of Pyrethrum: the microencapsulated formulation helps to increase the residual effect as the active ingredient is protected by capsules and is released slowly. Contains no solvents. The diluted solution is odorless, non-staining and will not damage the plants.

Finicon Pyrecap 8-02 kills insects that are present at the time of treatment and prevents future infestations from developing for at least 2-3 weeks. The product is effective against most irritating or harmful insects found in commercial, domestic or industrial environments (cockroaches, scorpions, ants, fleas, spiders, bugs, ticks, silverfish, insects infesting warehouses and storerooms, occasional invaders, as well as mites). It is also effective against flying insects like flies, horseflies, mosquitoes, midges and wasps that are exposed to the treated surfaces, such as walls, floors, shutters, curtains, upholstery, etc.

Methods and dosages for use

Indoors: apply the insecticide solution using normal spray pumps, paying particular attention to the areas around the rooms' perimeter, skirting boards, corners and cracks, the back of furniture, kitchens, ovens, fridges, waste storage sites, toilets and wherever insects are likely to be nesting or pass through. For flying insects, treat surfaces where they tend to set down. If treating a farm, remove animals before treatment and vent the enclosures well before allowing the animals going inside again.

Outdoors: apply on walls, windows, windowsills, eaves, hedges and waste storage sites. In order to prevent and discourage re-infestation of the interior, we recommend spraying about 1 meter up the perimeter walls of the buildings and, at the same time, spraying a 1-meter-wide strip of ground all around the buildings.

For treatments on non-absorbent surfaces from 5 to 10 ml per liter of solution depending on the degree of infestation; on absorbing surfaces (like rough walls) from 10 to 20 ml per liter of solution.

Finicon Pyrecap 8-02

Concentrated microencapsulated natural insecticide based on natural Pyrethrum. Effective against a broad spectrum of insects.

Manufacturing company

Vebi Istituto Biochimico s.r.l.
Via Desman 43
35010 Borgoricco (PD), Italy
Tel. (+39) 049 9337111
Fax (+39) 049 5798263
www.vebi.it

Appearance, color and smell

Yellow liquid with pungent odor.

Composition

Pyrethrins (CAS 8003-34-7)	2,1 g
PBO (CAS 51-03-6)	10 g
Water and co-formulants as needed to	100 g

Warnings

Do not spray product into the air: spray on surfaces only. Do not contaminate food, drink or their containers during use. Avoid breathing spray and wash your hands if they have insecticide liquid on them.
