

Technical Data Sheet

Product: Xlure 4 Seasons

Product Function: Monitoring of insect populations

Description: This product is a pheromone lure for Indian meal moth, the mediterranean flour moth, the tropical warehouse moth and the tobacco moth

Latin Name: *Plodia interpunctella*, *Ephestia kuehniella*, *Ephestia cautella*, *Ephestia elutella*

Active Ingredients: Z,E-9,12-tetradecadienyl acetate

Longevity: 13 weeks

Dispenser: Polyolefin vial with cap.

Packaging: Airtight metallized sachet

Trap Application:

Remove the lure from the packaging and place in the cage of the Mothcatcher trap. The Xlure 4 Seasons should be placed as a permanent part of an integrated pest management programme in large areas. Secure the Mothcatchers in a grid formation throughout the building to ensure optimum monitoring.

Trap Density:

Place one trap every 100m².

When to Use:

Use this product all year round, there are different colours to signify seasonal replacement.

Replacement:

Replace the lure every 13 weeks. Alternate the colour of each lure on each replacement. Dispose of old lure away from the monitoring area. Service trap when it starts to fill with insects.

Storage

Store in a cool, dry place out of direct sunlight.

- When stored in a cold room of 10-20°C, this product will last 6 months.
- When stored in a refrigerator at 4-9°C, this product will last 12 months.
- When stored in a freezer at -18°C, this product will remain effective for 24+ months.

Precautions

- Handle carefully, avoid extensive contact by hand and wear gloves when handling.
- Do not eat or drink while handling this product.
