microsol[®] **pyrho SP-autofog**

- ✓ total-release automatic aerosol-fogger against **beetles**, **moths** and **larvae**
- ✓ with **natural pyrethrum**
- ✓ synergized with Piperonyl butoxide

The one and only BVL-approved automatic aerosol-fogger against beetles AND moths.

microsol[®] pyrho SP-autofog

The **only** total-release automatic **aerosol-fogger** for the control of **beetles and moths** in mills and warehouses which is registered by the BVL in Germany and which may also be used in the presence of openly stored products without having to cover or to out-source them (please check the label).

Highly effective and extremely fast acting Pyrethrum aerosol, synergized so that the effect is increased in an optimal way, acting against a huge number of stored product beetles and moths (different development stages).

The automatic fogger works standing upright as well as up side down. Very comfortable application in small and medium-sized rooms as well as in silos. For larger volumes **microsol[®]-pyrho-fluid** should be used.

Very user-friendly and safe: the process can be stopped any time. This makes it possible to dose the aerosol exactly or to use it once more.

May also be applied as a biocide against flying and crawling hygiene and textile pests.

Type of preparation

total-release automatic aerosol-fogger

Active ingredient(s)

nat. Pyrethrins 8 g/l (1,15 w/w)
(Chrysanthemum cinerariaefolium, ext.),
Piperonylbutoxide 48 g/l

Application rates / dosage

grain (stored open):
against stored product insects
max. 3 x 4 tins per 1.000 m³
against adult harmful moths
max. 10 x 1 tin per 1.000 m³

stored products (stored open):
against stored product insects
max. 1 x 4 tins per 1.000 m³
against adult harmful moths
max. 3 x 1 tin per 1.000 m³

Hazard symbol

GHS02, 07, 09

Registration / authorisation / acknowledgement

Plant Protection Act: 006423-60,
BAuA - German biocides registration
no.: N-55665

Packing units

750 ml tin, 6 tins per carton

Technische Details

all important details at a glance:

- ✓ ready-to-use aerosol-fogger with fast release- and knock-down effect
- ✓ for the control of moths and beetles
- ✓ rapid degradation of the active ingredient **natural pyrethrum**
- ✓ works both upright and upside down
- ✓ cereals, cereal products and processed oilseed products: waiting time 21 days
- ✓ nuts, dried fruit and tobacco: no waiting time (F)
- ✓ spot treatment:
direct spraying onto suspected infested areas or cracks and crevices for a few seconds
- ✓ **also suitable** for **use as a biocide against hygienic pests** (e. g. cockroaches, ants, silverfish, fleas, bugs)
