

Agrilaser® Lite

Compact and easy to use

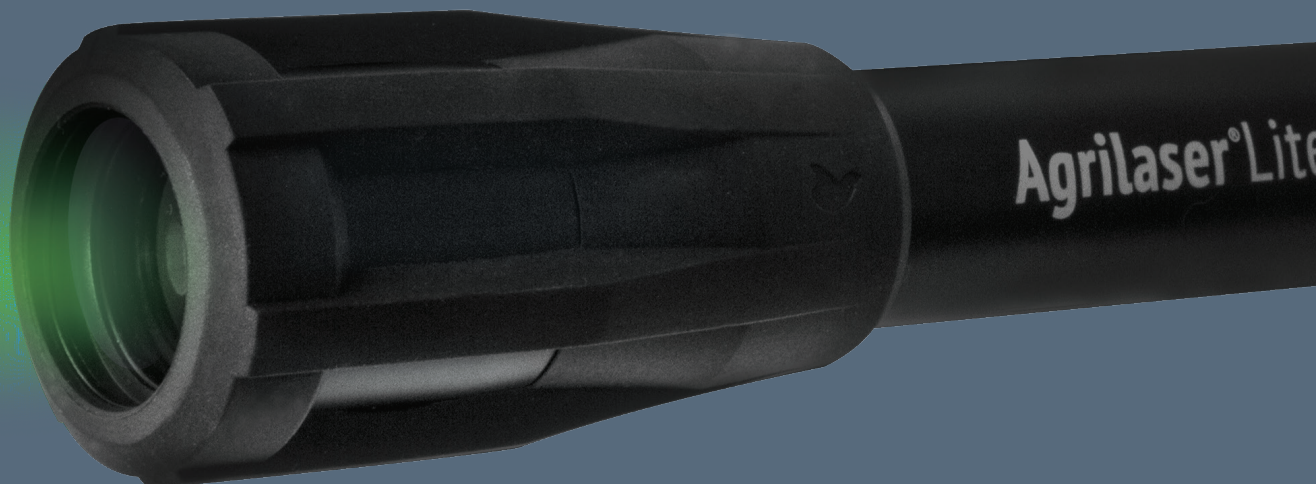

Range up to 1000 meter

Immediate and long-lasting results

Animal and environmentally friendly

Rugged design

Waterproof

Agrilaser the compact solution to bird nuisance

Compact and lightweight

The Agrilaser Lite is a highly effective and affordable tool to reduce bird nuisance. Due to its light weight and compact size, you can take the Agrilaser Lite with you on your daily routine to repel birds anywhere and anytime.

Advanced laser technology

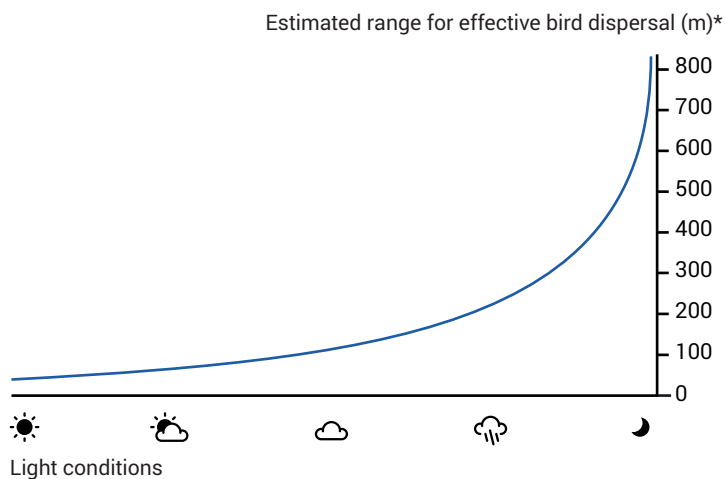

Bird Control Group dedicated years of research to develop the ultimate laser beam. This was accomplished through the application of a combination of highly precise optics, filtering and light frequencies. The result is exceptional performance in bird repelling over long distances.

Waterproof and rugged design

The Agrilaser Lite has a robust design to ensure effectiveness in demanding situations. The shockproof cover protects the laser from damage from falls, and water and dust exposure to enable use in a wide variety of environments and in almost every weather condition.

Technical specifications

Laser beam color	Green
Service life laser source	5,000 h
Power source	2 x CR123 battery
Power input	3.6 VDC – 9 VDC
Energy consumption	2 W
Dimensions (L x W x H)	196 (7.7) x 40 (1.6) x 40 (1.6) mm (in)
Weight	200 g (7.1 oz)
Endurance	IP66 (Waterproof)
Operating temperature	-10 °C to +35 °C (14 °F to 95 °F)

* Range of effective bird dispersal depends on the following factors:

- Local environmental conditions (albedo)
- Stability of the laser device
- Relative altitude of laser device with respect to projection surface

WARNING – LASER RADIATION
AVOID EXPOSURE TO BEAM
CLASS 3B LASER PRODUCT

MAXIMUM OUTPUT <50 mW
WAVELENGTH 532 nm
CLASSIFIED TO NEN EN 60825-1:2014

20161213

CONFIDENTIAL

Agrilaser Lite is designed and manufactured by:
