

Networkbird Net Guarantee

10/05/12

Networkbird nets are manufactured from UV stabilised polyethylene.

Networkbird nets may be exposed to changing weather conditions and as such these quality products have been developed with durability in mind.

Networkbird nets are guaranteed to remain fit for purpose for a period of at least 5 years under normal UK weather conditions. This guarantee is subject to the products being properly installed by a competent professional using appropriate Networkbird fixings and techniques.

Installations subject to poor air quality such as those found in chemical and marine type locations are not covered by this guarantee. Damage caused by 3rd party interference or vandalism or snow is not covered by this guarantee.

Should the product not comply with this guarantee, then replacement products will be delivered to you without any charge.

Your statutory rights are not affected.

If you have any quality or durability concerns regarding Networkbird nets please contact the Pelsis Technical Department.
